3. Glossary of Terms

3.1 The following symbols are used in the procedures detailed in this guide.

	Quick Reference The quick reference lists a simple set of steps that will quickly lead you through the procedure. If you don't know how to perform a step, check the corresponding step in the detailed description (the step numbers are the same).
	Detailed Description The detailed description covers each step of the procedure in detail and includes all the options available on each screen. To help you familiarise yourself with the procedure, the detailed descriptions also include pictures of the HealthPoint screen.
	Start Each procedure starts with a description of what state HealthPoint should be in before you work through the procedure. Most procedures start from the "insert/swipe" screen.
1.	Step Each procedure is made up of one or more numbered steps. Unless you are instructed to go to a different step, follow each step-in sequence through to the end.
	Additional notes or tips Some steps include parts that only apply if a certain condition is true or allow you to perform one of several options.
[]	Action Select the action specified in the [] square brackets i.e. 'select [ADD]'.
	Warning Do not ignore this screen!
	Finish The "thumbs up" indicates you've completed the procedure.
	Cross Reference In some parts of the procedures, you need to branch to the step or section shown by the cross reference symbol.
	Please Wait This symbol indicates that, at this point in the procedure, HealthPoint connects to the HealthPoint Health Message centre to send and receive information. This takes a few moments.

4. Some Tips from the Health Funds

To help you avoid some common mistakes with on-line claiming, the health funds have provided the following tips:

- Every time you swipe a patient's card and submit a HealthClaim, HealthPoint connects to the relevant health fund and makes a real, live claim for your patient.
- If a patient disputes the amount of a rebate, cancel the claim and advise them to make a manual claim with the health fund. Cancellations must be made on the same day of service.
- Whenever possible, make one claim for the whole consultation, including all the items covered. Separate claims for each individual item may mean your patient receives a reduced benefit.
- If a patient is receiving a course of treatment, make claims on a consultation by consultation basis, rather than one big claim at the end of the course.
- If you are unsure about which service item codes apply for a particular type of service, consult your professional association. The codes included in this user guide were provided by your association, in consultation with the health funds.
- You must not make a claim for a service or appliance you have not supplied. For example, you cannot claim for a pair of glasses until the patient has actually received the glasses, even if you bill the patient in advance.
- You must not make claims for deposits taken when ordering appliances (e.g. dental crowns, glasses), then claim for the remainder when the appliance is supplied. Make only one claim for each appliance when the appliance is supplied.
- Review the HealthPoint Service Terms and Conditions to make sure you understand your legal obligations under your agreement with the health funds. If you need another copy of your terms and conditions, call the HealthPoint Help Desk on 1300 301 692.
- Remember that the health funds have the right to refuse to accept a claim that does not comply with their requirements. If in doubt, always consult the health fund in question.

HealthPoint displays a message on the screen, which indicates what it is currently doing. These messages include:

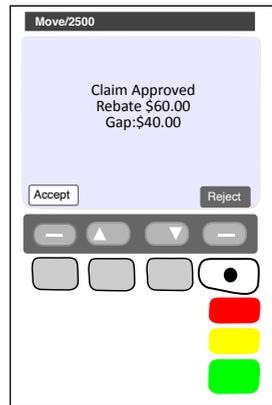

- CONTACTING HOST, PLEASE WAIT

After HealthPoint has finished submitting the claim and receiving the health fund’s response, it prints a copy of the claim receipt. HealthPoint prints an assessment, and then displays the HEALTH FUND “assessment” screen.

The printed assessment shows the health fund’s responses to each item and to the claim as a whole.

If you need to include one of these items in a claim, add it by using the [NEW] and [AD-HOC] keys described in the procedure for creating a claim.

The appearance of an item in this list in no way infers that that item will attract a rebate from the health funds. Also, the rebate on individual items may vary between different health funds.
